Shows the different verticle markets for berkshire grey

Bershire is creating mobile robotic platform, BG FLEXTM, The solution is now integrated with new high density buffering capabilities and enhanced goods-to-person and goods-to-robot picking stations in a single. modular package.
Walmart's about page that shows their general information

Walmart will be bringing Symbotic robots to 25 distribution centers

Walmart began rolling out its new FAST Unloader, an automated unloading conveyor system to its busiest stores. The conveyor reduces the time it takes for merchandise to reach customers on the sales floor.
